

Re: NAB's petition 04-160

As a registered voter I have grown tired of legislation whose sole intent is to protect an illgotten monopoly.

The point of government is to protect the individual not the corporation. This petition does nothing to protect my rights or interests but instead protects companies that have been given an unfair competitive advantage.

This petition should be summarily dismissed as it has no merit when considered from the viewpoint of the consumer it only serves to stifle competition and limit my choices.
